

HB HOWEY BAY RESORT & OUTPOSTS

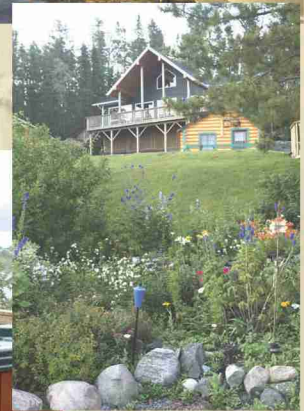

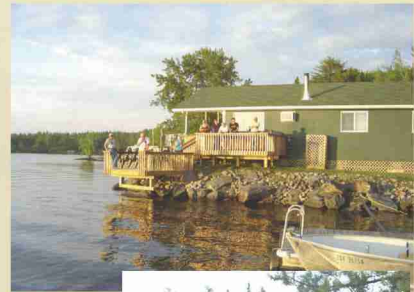

Red Lake, Ontario Canada 

Welcome...

We would like to extend a warm welcome to Howey Bay Resort. Because we are located a 'little farther up the road', you can vacation in an environment of fresh, clean air, pure water, safety and world class fisheries.

You can choose between a drive-in vacation at Howey Bay Resort or fly-in to one of our seven outposts. In both cases you should have a comfortable, enjoyable experience and leave feeling that we truly cared about you and the quality of your vacation.

Enjoy your vacation without the 'worries'. Our cabins are modern and very clean with the comforts of home; having everything from bedding and towels to dishwashers and microwave ovens. There are TV's, gas grills and some large cabins have such luxuries as hot tubs.

If you have a lap top computer bring it along since you can access free wireless high-speed internet in your cabin or you can also use the "guest computer" in the main office.

After a long day of fishing we have a 'historical' fish house in which you can socialize and prepare your fish.

Excellent Fishing & Hunting

Howey Bay Resort is located on the world class recreational resource of Red Lake - just across Howey Bay from the full service community of Red Lake, Ontario.

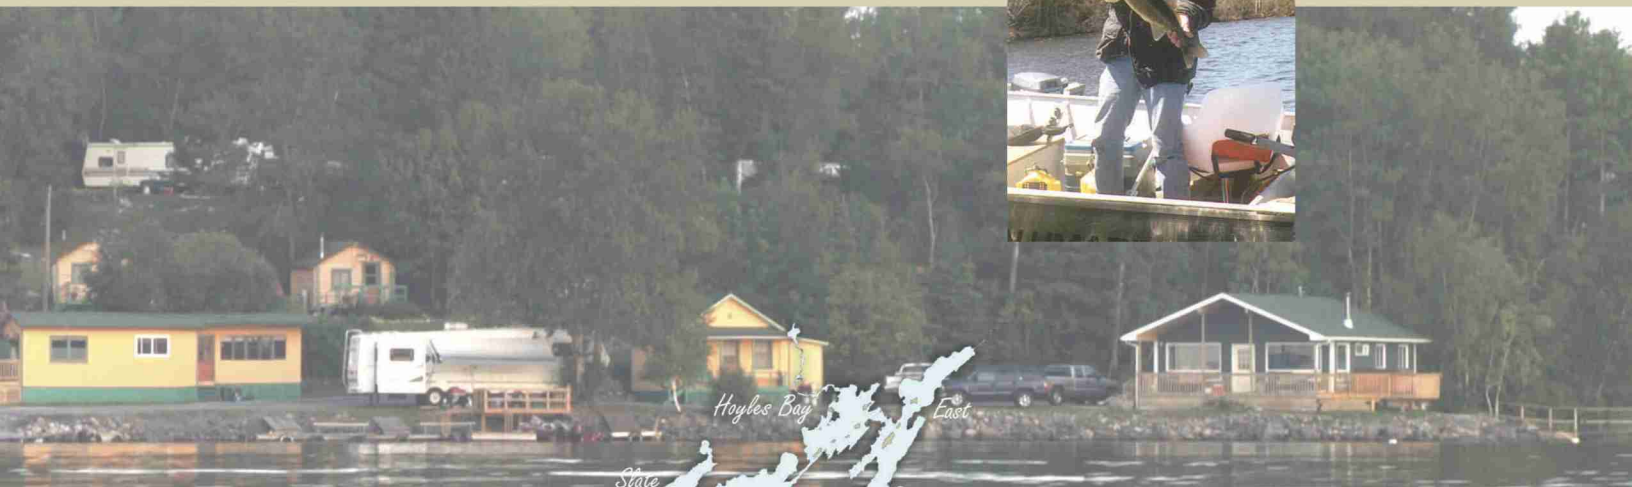

Excellent fishing for walleye, northern pike, whitefish, perch, trout and the occasional muskie starts at our docks and continues throughout the lake. The chain of Gullrock, Keg, Ranger and Two Island lakes is accessible by boat from our lodge.

Packages include the use of our 16' aluminum boats with 20 h.p. motors, plenty of dock space, gasoline, conservation fishing licences and everything you require to care for your fish. Larger boats and motors are also available to rent.

There are several RV full and partial service sites available. Showers and washroom facilities, guest parking and docks with power access and boat launching are also available. You can purchase your fishing licence and bait at our resort.

We offer a combination bear hunting and fishing package to a limited number of guests. You can choose to access a hunting area by boat or another hunting area by A.T.V.

We look forward to meeting you for the first time or seeing old friends once again. Our goal is to have you end your vacation feeling relaxed with new memories that excite you and make you look forward to returning next year.

Fly-In Outposts....fishing & hunting

Experience...the solitude of a fly-in fishing or moose hunting adventure at one of our exclusive outpost cabins. Enjoy nature in the wild where you will regularly see loons, whiskey jacks, and eagles, often see beavers and otters, and occasionally see moose or caribou. In most of our locations you will be the only guests on a 'lake of your own'.

We work hard to provide high quality facilities and equipment and keep everything as clean and tidy as possible. All locations have hot and cold running water, showers, solar powered lights, fridge, stove with oven, chest freezer, wood stove, and well equipped kitchen with all cooking and eating utensils etc. Even though the lake water is great to drink we filter it for drinking purposes. If you wish to communicate with us or your home, satellite phones are available. Our pilots will 'drop in' and check on you a couple of times during your stay to bring items you may need or just to say hello.

We believe in providing the highest level of personal attention and service in order that your holiday can be as enjoyable as possible.

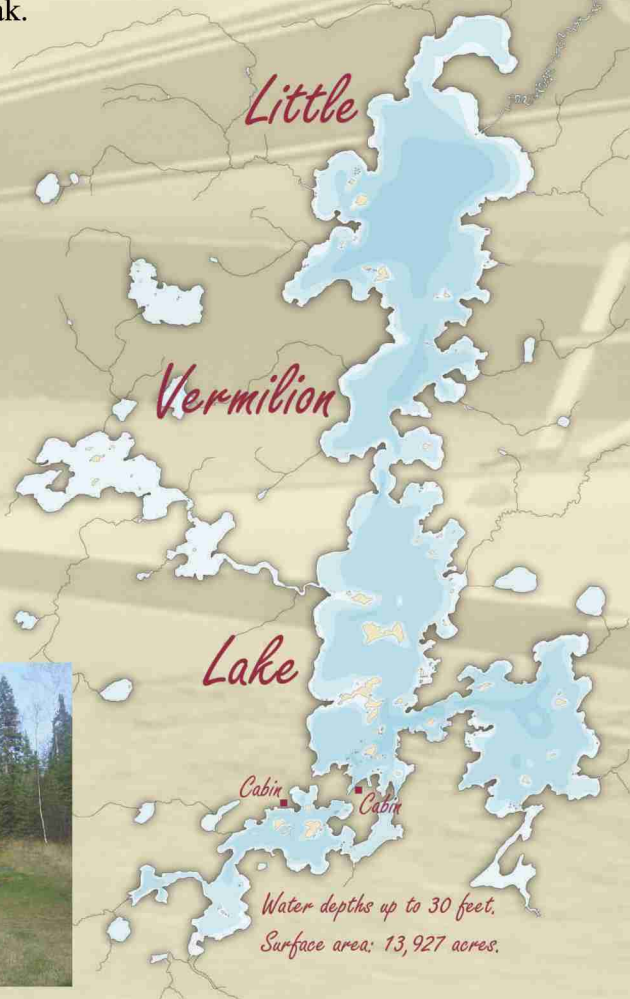

Moose Hunting....Over the years we have primarily specialized in high quality bow hunting experiences at our fly-in outposts. We will provide a professional guide when requested and offer various levels of support to ensure the comfort level and success of the hunter. For seven of our eight hunting locations, hunters will have the entire lake for themselves. A shooting area with a target is also provided so that hunters can keep their skill level at a peak.

Plenty of good-sized walleye and the chance to catch the 25 to 30 lb trophy northern characterize this lake. You can fish the entire week and not visit the same spot twice since Little Vermilion is over 15 miles long with many miles of shoreline and great structure. We have two 6 person cabins approximately 10 minutes apart in the southern part of the lake.

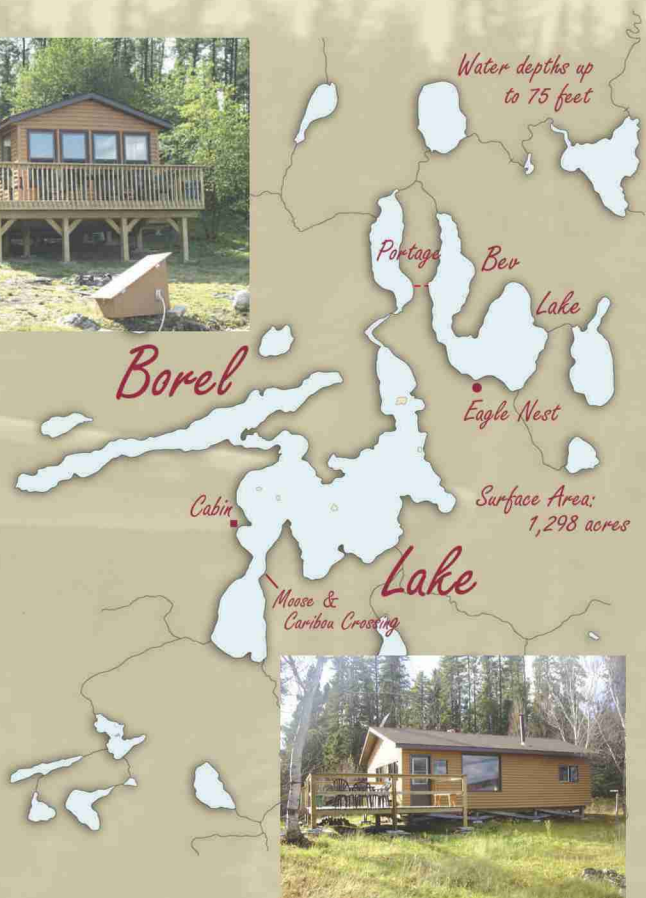

IB
HOWEY BAY
RESORT

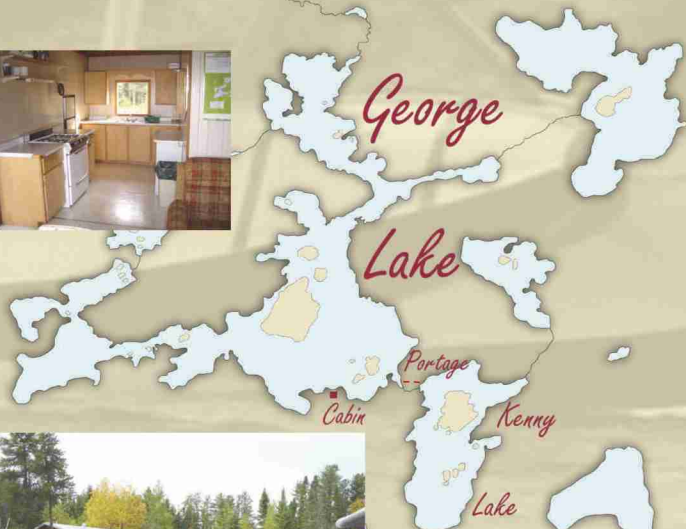

Lake depths up to 60 feet
Surface area: 1,539 acres

The Odin chain of lakes which include Toutin, Reigate, Lillycrop and Moose lakes, offer trophy northern pike and walleye fishing and a variety of experiences. You can stay at Odin all week and still not fish the entire lake. If you wish to walk anywhere from 5 to 20 minutes you can fish one of the four portage lakes for trophy fish. Our cabin sleeps eight persons and is the only cabin on the lake. Odin is catch and eat (with all the large fish released) and the portage lakes are catch and release only.

Borel Lake is known to many of our guests for the exceptional quantity and size of its walleye. Good northern pike fishing is an added bonus. Catch and eat the smaller fish is the practice here. Portage to Bev Lake for exciting catch and release walleye and northern fishing. Since there is a sizable moose population in the area, moose can often be seen while fishing and are definitely are seen by our hunters. Our six person cabin is the only cabin on the lake.

George Lake is a very picturesque lake which abounds with walleye and northern pike. Northern up to 20 lbs have been caught by many guests. This is a great lake for families with children since you can fish in most wind conditions, catch plenty of fish and generally catch fish right off the dock. A seven minute walk takes you to Kenny Lake for another fishing experience. George Lake is catch and eat while Kenny Lake is catch and release. Our six person cabin is the only cabin on the lake.

Water depths up to 35 feet
Surface area: 1,155 acres

Outposts....

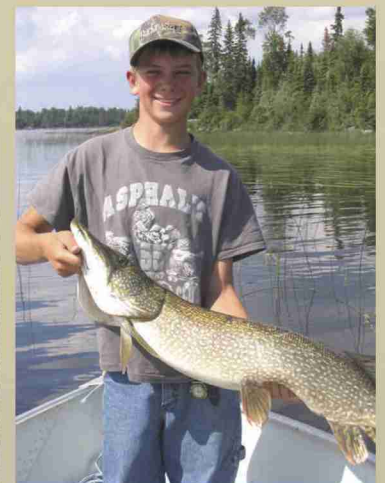

If you like the challenge of fishing great lake trout and the excitement of northern pike, Valhalla is a wonderful location. In addition, there are four portage lakes for a variety of fishing experiences. Trough Lake is full of northern pike while the three other portage lakes provide excellent walleye and northern fishing. Our guests often see moose as well as bald eagles and other wildlife. Our six person cabin is the only cabin on the lake.

Water depths up to 75 feet.
Surface area: 1,485 acres.

Water depths up to 30 feet.
Surface area: 3,692 acres.

Being approximately 5 miles long and containing strictly northern pike makes this lake a northern fisherman's dream. Northern pike range from minnows to 25 lbs or so. A seven or eight minute walk takes you to Philip Lake for high quality walleye and northern pike fishing. You can take walleye back to camp to eat but the northern in Philip must be returned to the water.

Enjoy...Howey Bay Resort

First Class Facilities

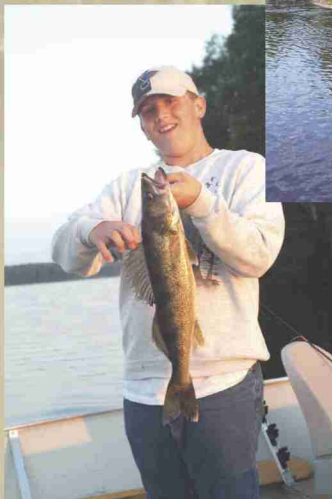

A Vacation for the Whole Family

Excellent Fishing & Hunting

Successful Moose & Bear Hunts

Serious About Conservation....

We and many of our guests believe that conservation must be practiced in order to protect the quality of our excellent fisheries.

For all circumstances, we encourage guests to quickly release walleye over 18 inches and northern pike over 27 inches. We also encourage the use of barbless hooks.

We provide a conservation license as part of our package at our drive-in resort.

At our fly-in outposts, the majority of lakes are managed by a strict catch and eat practice where our guests are encouraged to eat the smaller fish and release the rest. The majority of our portage lakes are managed through catch and release practices.

Effective use of Conservation Practices will ensure that the quality of the fishing remains strong for years to come and will allow our grandchildren to enjoy this great resource as much as we do today.
